18<sup>th</sup> February 2010

The refurbishment of the gentlemen's toilet is well under way.

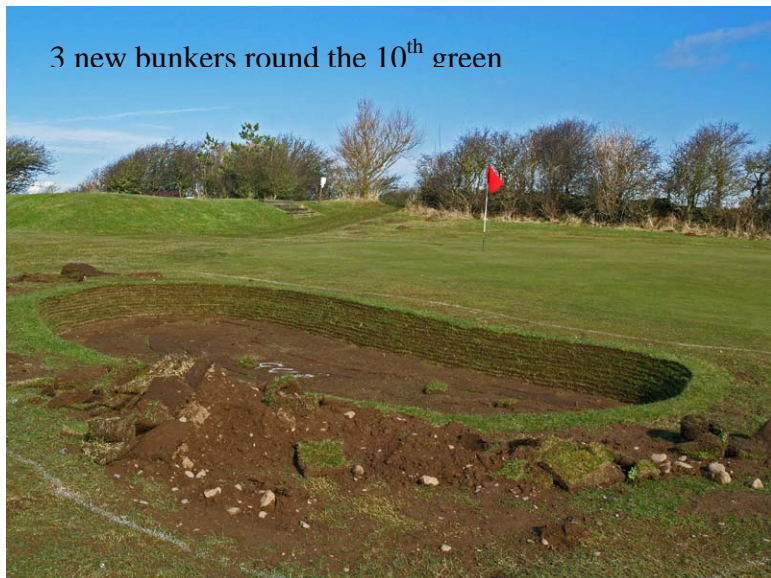

The old fittings have been removed and the tiling started. Some of the plumbing has been done and provision for the new lighting has been made.

The window will be replaced by a upvc double glazed fitment and although ordered will be about 2 weeks in the making.

It is expected that the majority of the work will be finished by the end of next week

3 new bunkers round the 10<sup>th</sup> green

Is that Andy supervising on the 12<sup>th</sup>?

At a meeting of the Greens Committee on Friday 5<sup>th</sup> February it was proposed to draw up written guidelines on who would be authorised to re-open the course following closure. The course is only closed to protect it, or on health and safety grounds. The guidelines when published must be strictly adhered to.

Most of you will have noticed a significant amount of work going in to course drainage improvements. Work already carried out includes replacing some of the old collapsed drains with new larger bore drains to ensure more efficient dispersal of standing water on the 10<sup>th</sup> and 13<sup>th</sup> holes. The cost of draining the course precludes being able to do the work all at once so it is proposed to produce a longer term drainage plan for the course, the work to be carried out during future winter periods.

The three new bunkers on the 10<sup>th</sup> and the modified bunkers on the 7<sup>th</sup> and 12<sup>th</sup> should all be finished by the new season start.

Work yet to be started but expected in the near future is the replacing of the three bridges across the 1<sup>st</sup> and 16<sup>th</sup> fairways.

## LATEST NEWS

Approximately 90 wooden lockers, some shoe lockers and 8 benches have been acquired from Carlisle Golf Club to replace our rather battered metal lockers. Tom McAvoy is coordinating the replacement but more on this in the next members information page.
